

Franklin Agency Ltd.

Capabilities Statement

Overview

We are a new company of cleared software engineers and architects, each with decades of individual experience contracting to defense and intel community sub-primes. We are seeking our first contract opportunity as a company and motivated to exceed expectations.

Competencies

- Custom Software Design and Development: C++, Java, Python, Rust, Linux, Red Hat
- Design, Implement, Operate: Distributed K8S Containers in Cloud, Hybrid, Data Ctr
- Intelligence Community: TS/SCI, C2S, C2E, NRO, NGA, SatCom, C2, Microservices
- Software as a Service, Infrastructure as Code, Self-Healing, Reliable, KISS systems
- Focus on Automated, Scalable, low maintenance, low TCO, Cloud and Hybrid solutions
- UI/UX Design: User-centered design practices that enhance usability and simplicity

Differentiators

- Software with low cost of ownership, that works without endless maintenance
- Deep experience in DoD/IC domains, productive day one, incremental delivery
- Software Engineering from proven experience, without buzz-word distractions
- Keep it Simple, to deploy, to operate, to maintain. Complication is a poor design
